

TABLE OF CONTENTS

摘要.....	i
ABSTRACT.....	ii
誌謝詞.....	iii
TABLE OF CONTENTS	iv
LIST OF FIGURES	vi
LIST OF TABLES	viii
1. INTRODUCTION	1
1.1 Background	1
1.2 Motivation.....	2
1.3 Research Framework	3
2. LITERATURE REVIEW	5
2.1 Probabilistic Traveling Salesman Problem (PTSP)	5
2.1.1 Problem Definition and Related Models.....	5
2.1.2 Methodology and Complexities.....	7
2.2 Dynamic Traveling Salesman Problem/ Dynamic Vehicle Routing Problem (DTSP/DVRP)	9
2.2.1 Introduction.....	9
2.2.2 Courier mail services	10
2.2.3. Double-horizon (DH) based heuristic	11
3. MODEL CONSTRUCTION.....	13
3.1 Problem Statement	13
3.2 Model Framework.....	15
3.2.1 A multi-objective <i>a priori</i> PTSP model	16
3.2.2 Expected values in PTSP	18

4. TWO-STAGE HEURISTIC METHOD	21
4.1 The Local Search Techniques	21
4.1.1 The 2-p-opt local search.....	22
4.1.2 The 1-shift local search.....	23
4.2 Stage I - Initial Feasible Route Construction	25
4.2.1 The Slack-time Maximizing (STM) Method	25
4.2.2 The Backtracking Method.....	28
4.3 StageII - Route Improvement.....	31
5. COMPUTATIONAL RESULTS	33
5.1 Algorithms Comparisons	33
5.2 The Simulation Results of Different Parameter Settings	34
5.3 The Impacts of Different Proportions of Immediate Requests to All Customers	39
5.4 The Impacts of Different Widths of Time Windows.....	42
5.5 The Impacts of Different Request Probabilities.....	44
6. CONCLUSIONS.....	47
7. REFERENCES	49

LIST OF FIGURES

Fig. 1.1 Framework of this study	4
Fig. 2.1 Simple graphical example of a PTSP	6
Fig. 2.2 Intersection of the optimal PTSP tour	8
Fig. 2.3 The two time horizons	12
Fig. 3.1 Simplified framework of common carrier network.....	14
Fig. 3.2 Hierarchical objectives	17
Fig. 3.3 Four instances of a four-nodes example	20
Fig. 4.1 The two-stage heuristic method.....	21
Fig. 4.2 A simple example of 2-p-opt neighborhood	22
Fig. 4.3 The flowchart of the 2-p-opt local search.....	24
Fig. 4.4 A simple example of 1-shift neighborhood.....	25
Fig. 4.5 The flowchart of the STM method	27
Fig. 4.6 The flowchart of the Backtracking method	29
Fig. 4.7 A simple illustration of the Backtracking method	30
Fig. 4.8 The flowchart of route improvement (Stage II) heuristic	32
Fig. 5.1 The calculating time comparison of GENIUS and the proposed algorithm...	36
Fig. 5.2 Average total traveling time under different degree of dynamisms.....	41
Fig. 5.3 Differences between average numbers of accepted immediate requests under different average widths of time windows	43
Fig. 5.4 Differences between average total traveling times under different average widths of time windows	44
Fig. 5.5 Differences between average numbers of accepted immediate requests different request probability of regular customers	45
Fig. 5.6 Differences between average total traveling times under different request	

probabilities of regular customers.....	46
